HOMECOMING '69 ... A SUCCESS!

Students Choose Judy Jackson For Homecoming Queen

New Queen beams as she receives her crown.

Homecoming '69 is over, but for this year's queen, Judy Jackson, its just begun.

Judy was crowned queen last Friday night at 9:00 p.m. during the annual homecoming dance at the Armory by last year's queen, Jackie Muhr. Her court consisted of Sue Groff, Karen Zurawski, Rosemary Lacosta, and Gail Kolpin.

With tears in her eyes, the new queen accepted the tiara and roses that symbolize her royalty.

Judy, a junior majoring in Biology, at Cal, is corresponding secretary for Student Congress.

Announcement of the winners in the Homecoming parade were made the next day during half-time of the soccer game.

First, second, and third place in the float division were awarded trophies and they went to: Phi Kappa Theta, the Electronics Club, and Pi Delta Phi, respectively.

Only one trophy was awarded in the car division and this year it was presented to SEA.

Dragie "tucks him in the turkey."

Pipers "Smite Them"

The Pipers slogan for the game was "Smite Them" and although they played to a 2-2 tie the Pipers tore the sister campus from Lafayette apart physically.

The game started off with a bang as the Pipers constantly knocked the Boilermakers on their backs and kept pressure on their defense but couldn't score, and the first quarter ended 0-0. The second quarter was very much the same but two defensive lapses left the Pipers behind 2-0 at the half.

After a talk by Coach Shields, the Pipers played like animals. They seemed to be everywhere and it paid off well. Willie Martin sent a pass down to Tom

Galouzis and Tom sent it past the Lafayette goalie to make the score 2-1.

Later on in the quarter Tom Galouzis broke away from the defensive and sent another whizzing past the goalie and tied the game at 2-2.

Although the game ended in a tie, I'm sure that the Boilermakers will not forget the game.

Our Pipers beat them up so badly that the Lafayette captain wanted to walk off the field.

On behalf of the team I would like to thank you for your support at the game because without a doubt you were the best crowd and noisest crowd to be at any Purdue Cal athletic event.

Who's Who Honors Ten Purdue Students

After a minimum of two full years in college and part of a third year, a student becomes eligible to be selected as a member of his school's elite; to be included in "Who's Who" Among Students in American Universities and Colleges. Initiated by Mr. L. L. Perkins last year, Purdue Calumet students are now one of the many colleges included in "Who's Who's" list of names.

The nomination process started by having the faculty and academic advisors submit lists of names of those students who they thought might qualify. From there the Nominating committee met Sept. 25 and decided on 11 nominees. These names were then sent to the "Who's Who" editors who sent back the approved nominees on Sept. 29.

For 35 years the editors of "Who's Who" Among Students

in American Universities and Colleges" have attempted to identify and reward this nation's best students and most promising leaders.

The second annual appointees from Purdue Calumet to "Who's Who" are: Larry Atkins, William Boberski, David Chamberlain, Danny Dragie, Douglas Fix, Gerard Lamoureux, Robert McCullough, Elizabeth Ridriguez, Marilyn Schultz, and Henry Williamson. These are our members of the top 1% of America's collegiate population skilled in scholastic ability and/or leadership, but in most cases; both.

Effective September 1, 1969 the service charge for returned checks cashed through the Calumet Campus Check Cashing Service will be increased from one dollar to two dollars.

PURDUE UNIVERSITY CALUMET RECRUITING SCHEDULE FOR NOVEMBER, 1969 SIGN UP FOR INTERVIEWS - PLACEMENT OFFICE R-151

Letters to the Editor

The U.S. involvement in the Viet Nam War is a big mistake—so was our entry into WWI and WWII. In WWI, munitions manufacturers benefitted most. Pearl Harbor was the Japanese answer to the challenge of the United States.

The United States can win in Viet Nam, but our government has not been willing to risk an action like those of the USSR in Hungary and Czechoslovakia. The war contributes to the uncertainty of our economy, but any large scale government expenditure would have a similar effect.

The thousands who have died in Viet Nam have not died for anything. A similar commitment and involvement may never occur again. The dead were not killed by children. The Viet Cong and North Vietnamese are not children.

The days of fighting and winning a war are not over. Israel did win the "Six-day War." (Moshe Dyan is alive and well. He did not read your editorial).

The "Anti-War" people "educated" or not, fail to see the tetanic power struggle between East and West, the Communist Bloc and the Free World. Viet Nam, Thailand, Laos, Berlin, Czechoslovakia, Hungary, Korea, Cuba, the Dominican Republic, Indonesia, and the Egypt-Israel conflict can be seen in this light. The "Anti-War" groups, unwittingly or not, serve the cause of the Communist Bloc. Their protests only strengthen the American far right. The havoc and confusion created by Viet Nam and the "Anti-War" groups will accelerate the march of the right—not a George Wallace but a George Lincoln Rockwell. The

American people will choose autocratic leadership and discipline over free license and anarchy.

The most patriotic thing any American can do is to cheer the march of the right—the New Order—who will assert American leadership in the world struggle against the Communist Bloc.

Ray DeVries

Dear Editor,

In regard to the editorial appearing on page two of your October 10 issue, I would like to state my disagreement with both it's content and your policy in printing it. The editorial is anti-war to which opinion I have no complaint. I believe that the facts however should be kept straight. The writer claims that "thousands, even millions of boys who have died in Viet Nam have died for nothing." In the first place the death toll in Viet Nam has not exceeded thirty-seven thousand. Secondly I challenge that the editor, unless a person who was directly involved with the war, has been there, and has personally seen what is, and has been, going on in all phases of the conflict, is not qualified to make the value judgment that it is all for nothing.

The statement was also made that we are "fighting children in the jungles." I fought them for fourteen months. They are not children. A sixteen-year-old V.C. with an AK 47 will kill you just as dead as an experienced V.C.

It is poor editorial policy that allows an article to be printed without first checking into the authenticity of its claims. I hope that future issues will not exhibit the same error. Thank you.

Robert W. McNamara

P.U.C.C. GROWS

Academically...

Purdue Cal is not only expanding physically, but academically as well. Specifically, this year started off with the expansion of the biological sciences, plans for a program in the area of supervisory personnel, and the return of the "Beginning Photography" course.

With the expansion of the biological sciences students will be able to complete a B.S. degree in laboratory technology, biological teaching, pre-dentistry and pre-medicine, and just plain biology.

This year opens with the adding of the junior year, next year the senior year will be added so that the class of "71" will be the first class to graduate with 4 years in the biological sciences.

With the completion of the biological sciences program PUCC will be, for the first time, offering well rounded B.S. degrees in all three sciences.

Directing the growth of the biological sciences is Prof. Kenneth S. Wilson, head of our biology department at PUCC, and a Purdue faculty member for 18 years. He assures us that a number of labs, including a self-study lab where the student can study on his own time, will be added to accommodate the program.

The enrollment in the biology area at PUCC has tripled to 909 students over the last three years.

After 36 years with the Sinclair Oil Corporation, Mr. Donald E. Norris had been hired to develop, and enlarge the management training programs here at Cal.

He plans to find out what industry needs, and develop programs here along those lines. According to Dr. Norris, this type of action may help make PUCC develop into one of the largest management training programs in the mid-west.

So far there are two management training seminars planned to run from October 7 thru 23 on Tuesdays and Thursdays. Each is planned to run for three hours, and are part of a Supervisory Task Series. The first, "Supervisory Planning" for change will be offered 2-5 p.m. and the

second, "The Supervisor's Management Trade" from 7-10 p.m.

They will be taught by staff from Lafayette's Department of Industrial Supervisors.

The "Beginning Photography" course, because of its past success is being sponsored for a second time by the Office of Continuing Education.

It will involve six class sessions and two field trips, one to a photographic lab, and the other to a local camera clinic. On both of these, students will use their own photographic equipment to photograph the different subjects.

The sessions will be held on Tuesdays and Thursdays from 8-10 p.m. for 8 weeks starting October 7, and ending November 27th. Mr. Barnes, the instructor, has had 20 years experience in the Chicago area, and is presently a photographic technician at WGN-TV in Chicago.

Registration for the industrial, and photographic classes, has already begun.

As Purdue Cal is expanding physically, many of her activities are also expanding. Included in this list are those of the music department.

David Simpson, assistant professor of the creative arts, has recently announced the organization of Purdue Cal's first Pep Band.

The group was formed following a general meeting of students. With an initial membership of 15 instrumentalists, there are still some openings for clarinetists and percussionists.

The newly formed band will play at athletic events and freshmen orientation meetings.

Simpson also said that the Purdue Cal Chorus will perform again this year. The group has a broad concert schedule. Besides this, the 40-voice mixed

ECHOES OF THE MIND

Without

i look In -
i peer Out -
i am Indeed
withOut a doubt
alone
left Out
nor am i In
but just withOut -
my Outsides Inward drawn
my Insides Outward yearn
must i go on and on -
not stepping In
not getting Out
but just
withOut

And Culturally

singing group has performed for honor assemblies, Christmas Convocations, Commencement Exercises, and other activities in past years at this campus.

Simpson said a survey of students further indicates a growing interest in forming a glee club and an orchestra. He asked that people interested in taking part in these activities contact him on Tuesdays or Thursdays between 9 a.m. and 10 a.m. in Room 103 where the groups rehearse.

Assisting Simpson as student director is Miss Jillinda Molnar of Munster. She is working with both the choir and the band. Miss Molnar is majoring in music education. She is a part-time student at the Calumet Campus, and she is also taking classes at the American Conservatory of Music in Chicago.
